### **Rullpack REACH statement**

Rullpack AB is well aware of the new chemical legislation, REACH, which entered into force on June 1<sup>st</sup> 2007.

Rullpack AB is a downstream user and will not place on the market any substance that is not registered in accordance with REACH. The suppliers to Rullpack AB are required to register substances or ensuring that the substances they provide are registered by their suppliers. The communication in the supply chain is of greatest importance and Rullpack AB encourages and put emphasis on proper exchange of information. Rullpack keep close contact with its suppliers and rely on an open and straight communication which ensures compliance with REACH as the best of our knowledge.

Rullpack AB will only use substances which are registered or pre-registered according to REACH. Our raw material suppliers have not notified any substances of very high concern (SVHC). We constantly review if any SVHC substances will occur in our supply chain and do not foresee any such changes in the near future in our product portfolio. New substances included to the candidate list by ECHA will be monitored and reviewed in our supply chain.

Rullpack AB will in accordance with article 31-34 provide and seek information up and down stream in the supply chain.
